Content

Pulse, Tongue Facial diagnosis explained based on Paul's 20 years experience

Tongue and facial data are translated into an accurate and reliable assessment of the patient's condition.

Paul explains how the Pulse has 5 levels of depth, these include floating, superficial, moderate, deep and hidden and how Chinese physicians analyse the 29 different classical pulses by splitting them into 5 categories of speed, level, condition, energy and volume.

Pulse, Face, tongue are cross referenced for confirmation
